This guide will help you master all of the weapons present in Rainbow Six Siege, updated with every new entry and balancing change. Hours of collecting data has culminated here, offering you a list of **optimal loadouts** for each weapon on each operator in the game. While **recoil control is a massive contributing factor** to the attachments we choose, this list takes into account **every factor**, including **Damage, TTK, Visibility, and Operator Specific Playstyles**.

To use this guide, first **have a weapon in mind** and know it's classification (i.e. Assault Rifle, Shotgun, Light Machine Gun, etc). Scroll down to locate the **Table of Contents** and find the weapon or category. Alternatively, Locate the Document Tabs popout on the left side of the screen (on the bottom on Mobile) in Google Docs. This will bring you to the weapon, where a table is present for each operator with that weapon in their loadout.

Thank you for reading!
